HEADHUNTERS

INDUSTRY : Insolvency

The Insolvency industry is set to have many calls on the seasoned professionals who skillfully and ethically plough this furrow.

Although many of those that flourish in the world of Insolvency would never have considered this for their career they have brought a grace and sensitivity to ease the suffering of the many stricken clients that they help.

However, with company insolvency set to increase once the lockdown restrictions are lifted and Government protections are eased back, the sector is predicted to be busier than ever.
